

Relaunching Amazon Music in India

Product-Led Growth Strategy for Acquisition & Engagement

PRESENTED BY: VIKAS VISHWAKARMA · PRODUCT STRATEGY & GROWTH

Project Overview

Amazon Music India Relaunch Strategy

+ Strategic Objective

Relaunch Amazon Music in India with aggressive acquisition and engagement strategy to capture market share.

+ PLG Framework Alignment

Align with Product-Led Growth principles and Race Car Framework for sustainable, self-driven growth.

+ Key Deliverables

Go-To-Market Acquisition Strategy (50%) and comprehensive Engagement Strategy (50%) for evaluation.

India Music Streaming Market

25%

Annual Growth Rate

\$750M+

Market Size 2024

700M+

Smartphone Users

Acquisition Strategy

Target Audience

Gen-Z Students

18-24 Years

Budget-conscious, trend-driven. Seeks free/affordable streaming, viral playlists, and social sharing features.

Young Professionals

25-35 Years

Premium experience seekers. Values seamless ecosystem integration, AI curation, and ad-free listening.

Tier-2 Regional Users

All Ages

Regional language content lovers. Needs local music, low data mode, and vernacular interface.

Product Vision & Target Audience

"Amazon Music will become India's most personalized, affordable, AI-powered, and regional-first music platform."

Gen-Z Students

18–24, budget-conscious, social-first, mood-driven listening.

Young Professionals

25–35, Prime members, value convenience and audio quality.

Tier-2 Regional Users

Regional language preference, low-data environments, family sharing.

Families

Multi-generational households, diverse music tastes, value bundled plans.

Competitor Analysis

Competitor Analysis

Spotify leads with superior AI personalization and global brand recognition, but lacks deep regional content

YouTube Music dominates with free tier and video integration, strong regional catalog from YouTube ecosystem

JioSaavn owns regional market with extensive Bollywood and indie content, aggressive Jio bundling strategy

Apple Music offers premium audio quality and ecosystem lock-in, but limited price flexibility for India

Competitive Gaps

- **Spotify: Strong AI, but premium pricing limits mass adoption**
- **YouTube Music: Free tier + video integration gives strong ecosystem advantage**
- **JioSaavn: Dominates regional content and telecom bundling**
- **Amazon Music: Prime bundle is a differentiator, but low awareness and weak regional presence hurt adoption**

Spotify:
Strong AI,
premium
pricing.

YouTube
Music:
Free tier,
video
integration.

JioSaavn:
Regional
focus,
telecom
bundles.

Apple
Music:
Premium
audio, high
quality.

Wynk
Music:
Airtel
bundle, local
content.

Amazon
Music:
Prime
bundle,
Alexa.

User Acquisition Channels

Digital Marketing

Campaign: "**Har Mood Ka Music**" — Reels, memes, mood playlists across Instagram, YouTube, Facebook. CPI & retargeting ads targeting Spotify/YouTube Music users.

Influencer Strategy

Dance creators, lifestyle influencers, regional & college creators.

#AmazonMusicMoodChallenge drives organic installs & virality.

Telecom Partnerships

Jio, Airtel, Vi bundles — free 3-month Premium, unlimited data packs for mobile-first India.

India Music Streaming Market

Key Market Drivers

- 550M+ projected streaming users by 2024
- Smartphone penetration fueling audio consumption
- Regional content boom across Hindi, Punjabi, Tamil, Telugu, Bhojpuri
- Young demographic (18–35) dominates listening hours
- Data affordability accelerating adoption

5-Month Launch Roadmap

PLG + Race Car Framework

The product itself becomes the **main growth engine** — creating value instantly, encouraging sharing naturally, and driving retention through personalization.

Growth Engine

Performance, Virality, Content, Ecosystem

Turbo Boost

AI, Gamification, Exclusives

Lubricants

Friction reduction, seamless UX

Fuel

Data, AI, Community, Culture

Core Problem Statement

Why Amazon Music is underperforming in India

Low Awareness

Most Indian users don't know Amazon Music exists as a standalone product.

Weak Emotional Connection

No cultural or regional identity — lacks the "mood music" emotional hook.

Poor Youth Adoption

Gen-Z prefers Spotify or YouTube Music; Amazon Music feels corporate.

Weak Regional Dominance

Under-invested in Hindi, Punjabi, Tamil, Telugu, and Bhojpuri catalogs.

Lack of Virality

No referral loops, playlist sharing, or social mechanics to drive organic growth.

Growth Engine & Turbo Boost

Growth Engine

- **Retargeting:** AI ads for inactive & drop-off users
- **Virality:** Playlist sharing, social listening rooms, Music Wrapped, Reels integration
- **Content:** Mood playlists, regional hyperlocal content, festival playlists (Diwali, IPL, Holi), podcasts
- **Ecosystem:** Prime Video cross-promo, Alexa voice-first, smart device integration

Turbo Boost

- **AI DJ:** Natural language requests + mood detection
- **Gamification:** Listening streaks, badges, fan levels — "Top 5% Arijit Singh listeners"
- **Exclusive Releases:** First-listen Bollywood, indie & regional tracks
- **Campus Communities:** College playlists, DJ competitions, organic promoters

Growth Engine

Performance Marketing: Targeted Instagram Reels, YouTube Shorts, and Google Ads driving app installs at optimized CAC

Virality Mechanics: #AmazonMusicMoodChallenge, referral rewards, and social sharing loops for organic growth

Content Strategy: Regional-first playlists, exclusive artist releases, and mood-based curation for Indian audiences

Ecosystem Sales: Prime bundle integration, Alexa cross-promotion, and Fire TV music experiences

Turbo Boost

AI DJ Mode delivers personalized radio experiences with voice-controlled music discovery

Gamification through listening streaks, badges, and leaderboards drives daily engagement

Exclusive artist releases and early access content creates urgency and loyalty

Seasonal challenges and mood-based rewards keep users coming back for more

Lubricants & Fuel

Lubricants — Frictionless Experience

- Fast onboarding: language, artist, mood → instant playlist
- Low data mode: compression, offline downloads, battery optimization
- Seamless UX: one-click play, smooth search
- Cross-platform continuity: mobile → Alexa → TV → laptop
- Smart notifications: only relevant, no spam

Fuel — Long-Term Drivers

- AI & listening behavior data for continuous improvement
- Independent artists, regional creators, podcasters
- Fan clubs, community playlists, shared culture
- Habit formation: gym, travel, study, sleep, party

Lubricants

Low Data Mode enables seamless streaming even on 2G/3G networks across Tier-2 and Tier-3 cities

Smooth Onboarding with AI-powered language and genre detection for instant personalization

Cross-Device Continuity syncs listening across mobile, Alexa, Fire TV, and web seamlessly

Friction Reduction through one-tap Prime login, smart downloads, and offline-first architecture

Fuel: Powering Sustained Growth

AI Data Engine: Machine learning analyzes listening patterns to deliver hyper-personalized recommendations

Community Building: Fan clubs, artist follows, and social listening features create belonging

Creator Ecosystem: Support emerging Indian artists with tools, royalties, and promotion opportunities

Emotional Habit Formation: Daily streaks, mood triggers, and ritual-based listening drive long-term retention

KPI Dashboard

Success Criteria

North Star Metric: Daily Listening Hours per Active User — the core indicator of platform engagement and habit formation

D7 Retention Rate: Target 45%+ users returning within 7 days of signup to validate activation success

Playlist Creation Rate: Track user-generated playlists as a proxy for personalization adoption and emotional investment

Referral Rate: Measure viral coefficient through invite completions and social shares to drive organic growth

Implementation Roadmap

Month 1–2

GTM Launch
Prime Bundle Integration
Digital Marketing Blitz
Influencer Onboarding

Month 3–4

Telecom Partnerships
Jio & Airtel Bundles
AI DJ Feature Launch
Campus Campaigns

Month 5–6

Regional Content Push
Tamil & Telugu Launch
Creator Ecosystem
Referral Program Scale

Risk Analysis & Mitigation

Spotify's aggressive pricing and creator partnerships pose significant competitive threat requiring differentiated value proposition

User retention challenges in a crowded market demand continuous AI-driven personalization and habit-forming features

Music licensing costs and regional content rights negotiations impact profitability and content availability timelines

Churn mitigation through Prime ecosystem lock-in, gamification rewards, and seamless cross-device listening continuity

Finally Recommendation

To win in India, Amazon Music must prioritize: Regional-first content dominance across Hindi, Tamil, Telugu & Punjabi markets. AI-powered hyper-personalization for mood-based discovery. Prime ecosystem leverage for seamless cross-platform engagement. Viral growth loops through social sharing & referrals. Product-Led Growth (PLG) with frictionless onboarding & value delivery.

Executive Summary

Market Opportunity

India's music streaming market is growing rapidly, driven by smartphone adoption and regional content boom.

Core Challenge

Amazon Music faces low awareness, weak youth adoption, poor regional dominance, and lack of virality.

PLG Vision

AI-powered, regional-first platform bundled with Prime — personalized, affordable, and emotionally resonant.

Expected Impact

Drive DAU growth, improve retention, and establish Amazon Music as India's top-tier streaming destination.

Thank You
